

# V2U-100A VGA + Audio to USB3.0 Adapter

## Features & Specification

V2U-100A is a USB 3.0 HD video and audio capture cable, which integrates USB 3.0 device controller, data transceiver module, video and audio processing module. V2U-100A can transmit the VGA & Audio input audio to PC, Smart phone and tablet for preview or acquisition through USB 3.0 interface. V2U-100A output supports YUV422 and MJPEG modes, compatible with Windows, Android and Mac OS systems.

- Convert any VGA or Component video with audio into perfect HDMI video signal with integrated audio. This means you can connect any computer that outputs VGA or any other video player that outputs component video (red, green, and blue RCA connection). This converter includes a scaling capability that will fit numerous VGA and Component Video resolutions to your HDMI TV. This ensures easy set-up. You'll never have to worry about fiddling around with your computer's resolutions just to fit your HDMI TV, only to change it back again when you want to use your computer monitor.
- Audio : USB audio default 48KHz stereo output / USB 3.0 / Integrated USB 3.0 device / Compatible with USB 2.0 device mode / USB video conforms to UVC1.0 specification / USB audio conforms to UAC1.0 specification
- USB video output : Supports both YUV422 and MJPEG modes /USB video output resolution / Default max resolution 1920× 1080@60Hz
- OS Support : Windows XP/7/8/10/11 / Android 5.0 or higher / Linux / Mac OS
- Applications
- High Definition Video Capture Card
- Security and Protection monitoring
- Medical Image
- VGA-In => PC / Note Book / Smart phone / DVD Player & Host of VGA-Out.....
- USB-Out => PC / Note Book / Smart phone .....
- Easy to install , Plug & Play, Powers free
- With screw hall / easy fasten
- Contents: VGA male to USB3.0 A male with 15Cm VGA cable
- Weight : 40g include cable. Dimension :46 \* 48 \*15 ( mm ) +15cm Cable.
